PREFACE	XV
ACKNOWLEDGMENTS	XXV
GUIDING PRINCIPLES FOR THE UX PRACTITIONER	XXVII

Part 1: Introduction

Chapter 1: What Are UX and UX Design?	3
1.1 The Expanding Concept of Interaction	3
1.2 Definition of UX	4
1.3 UX Design	7
1.4 The Components of UX	8
1.5 What UX Is Not	16
1.6 Kinds of Interaction and UX	18
1.7 Service Experience	22
1.8 Why Should We Care? The Business Case for UX	23
Chapter 2: The Wheel: UX Processes, Lifecycles, Methods, and Techniques	27
2.1 Introduction	27
2.2 The Basic Process Components for UX	29
2.3 The Fundamental UX Lifecycle Activities	32
2.4 UX Design Techniques as Life Skills	37
2.5 Choosing UX Processes, Methods, and Techniques	46
Chapter 3: Scope, Rigor, Complexity, and Project Perspectives	49
3.1 Introduction	49
3.2 Rigor in a UX Method or Process	49
3.3 Scope of Delivery	59
3.4 The Commercial Product Perspective and the Enterprise System Perspective	61
Chapter 4: Agile Lifecycle Processes and the Funnel Model of Agile UX	63
4.1 Challenges in Building Systems	63
4.2 The Old Waterfall SE Lifecycle Process	67
4.3 Embracing an Agile Lifecycle Process	70
4.4 The Funnel Model of Agile UX	73

Chapter 5:	Prelude to the Process Chapters	81
5.1	Introduction	81
5.2	Intertwining of Processes, Methods, and Techniques	81
5.3	A dedicated UX Design Studio, an Essential Tool for Teamwork	84
5.4	The Project Commission: How Does a Project Start?	86
5.5	The Middleburg University Ticket Transaction Service and the New Ticket Kiosk System	88
5.6	The Product Concept Statement	90
5.7	Welcome to the Process Chapters	93
Chapter 6:	Background: Introduction	95
6.1	This is a Reference Chapter	95
6.2	Brief History and Roots of HCI and UX	95
6.3	Shifting Paradigms in HCI and UX	107
6.4	Fun Interaction at Work	109
6.5	Who Introduced The Waterfall Model?	110
6.6	Silos, Walls, and Boundaries	111
 Part 2: Usage Research		
Chapter 7:	Usage Research Data Elicitation	117
7.1	Introduction	117
7.2	Some Basic Concepts of Usage Research Data Elicitation	119
7.3	Data Elicitation Goals and Our Approach	121
7.4	Before the Visit: Prepare for Data Elicitation	124
7.5	During the Visit: Collect Usage Data	131
Chapter 8:	Usage Research Data Analysis	143
8.1	Introduction	143
8.2	Distill the Essence from Your Usage Research by Synthesizing Work Activity Notes	145
8.3	Extract Work Activity Notes that Are Inputs to User Stories or Requirements	151
8.4	Extract Notes that Are Inputs to Usage Research Models	153
8.5	The Remaining Work Activity Notes Become Inputs to Your Method for Organizing the Notes by Category	153
8.6	Organize the Work Activity Notes	154
8.7	For Higher Rigor in Complex Projects, Construct a WAAD	155
8.8	Lead a Walkthrough of the WAAD to Get Feedback	175
8.9	Synthesize the “Elephant” that Is User Work Practice and Needs	176
Chapter 9:	Usage Research Data Modeling	177
9.1	Introduction	177
9.2	Some General “How to” Suggestions for Data Modeling	179
9.3	The User Work Role Model	180
9.4	User Personas	185
9.5	The Flow Model	187
9.6	Task Structure Models—The Hierarchical Task Inventory (HTI)	192
9.7	Task Sequence Models	197

9.8	Artifact Model	207
9.9	Physical Work Environment Model	210
9.10	Information Architecture Model	214
9.11	The Social Model	215
9.12	Hybrid Models	221
9.13	Model Consolidation	221
9.14	Wrap Up	222
Chapter 10:	UX Design Requirements: User Stories and Requirements	227
10.1	Introduction	227
10.2	User Stories	231
10.3	UX Design Requirements	240
10.4	Validating User Stories and Requirements	248
Chapter 11:	Background: Understand Needs	251
11.1	This is a Reference Chapter	251
11.2	A True Story: Voting Trouble Experienced by a Senior Citizen	251
11.3	History of Contextual Inquiry	252
11.4	The SSA Model District Office—An Extreme and Successful Example of an Environment for Data Elicitation	255
11.5	Roots of Essential Use Cases in Software Engineering	256

Part 3: UX Design

Chapter 12:	The Nature of UX Design	261
12.1	Introduction	261
12.2	What is Design?	264
12.3	The Purpose of Design: Satisfying Human Needs	267
12.4	Information, Information Design, and Information Architecture	268
12.5	Iteration in the Design Creation Sublifecycle	271
12.6	Design Lifecycle for the Agile UX Funnel	277
Chapter 13:	Bottom-Up Versus Top-Down Design	279
13.1	Introduction	279
13.2	Bottom-Up Design: Designing for Existing Work Practice	279
13.3	Abstract Work Activities	284
13.4	Top-Down Design: Designing for the Abstract Work Activity	286
Chapter 14:	Generative Design: Ideation, Sketching, and Critiquing	293
14.1	Introduction	293
14.2	Ideation	297
14.3	Sketching	314
14.4	Critiquing	322
14.5	“Rules of Engagement” for Ideation, Sketching, and Critiquing	324
Chapter 15:	Mental Models and Conceptual Design	327
15.1	Introduction	327
15.2	How a Conceptual Design Works as a Connection of Mental Models	328
15.3	Design Starts with Conceptual Design	333

Chapter 16:	Designing the Ecology and Pervasive Information Architecture	341
16.1	Introduction	341
16.2	Designing for Ecological Needs	341
16.3	Creating an Ecological Design	346
16.4	Designing an Ecology to Influence User Behavior	350
16.5	Example: An Ecology for a Smart Shopping Application	352
Chapter 17:	Designing the Interaction	359
17.1	Introduction	359
17.2	Designing for Interaction Needs	359
17.3	Creating an Interaction Design	361
17.4	Storyboards	365
17.5	Wireframes	372
17.6	Intermediate Interaction Design	374
17.7	Interaction Design Production	377
17.8	Maintain a Custom Style Guide	381
Chapter 18:	Designing for Emotional Impact	385
18.1	Introduction	385
18.2	Designing for Emotional Needs	385
18.3	Creating an Emotional Impact Design	387
Chapter 19:	Background: Design	397
19.1	This is a Reference Chapter	397
19.2	Participatory Design	397
19.3	Mental models: An Example of How They can Make for Entertainment	401

Part 4: Prototype Candidate Designs

Chapter 20:	Prototyping	405
20.1	Introduction	405
20.2	Depth and Breadth of a Prototype	408
20.3	Fidelity of Prototypes	410
20.4	Wireframe Prototypes	410
20.5	Build Up Prototypes in Increasing Levels of Fidelity	416
20.6	Specialized Prototypes	426
20.7	Software Tools for Making Wireframes	432

Part 5: UX Evaluation

Chapter 21:	UX Evaluation Methods and Techniques	435
21.1	Introduction	435
21.2	UX Evaluation Methods	441
21.3	Rigor versus Rapidness in UX Evaluation Methods and Techniques	445
21.4	UX Evaluation Data Collection Techniques	447
21.5	Specialized UX Evaluation Methods	449
21.6	Adapting and Appropriating UX Evaluation Methods and Techniques	451

Chapter 22:	Empirical UX Evaluation: UX Goals, Metrics, and Targets	453
	22.1 Introduction	453
	22.2 UX Target Tables	455
	22.3 Work Role and User Classes	456
	22.4 UX Goals	457
	22.5 UX Measures	458
	22.6 Measuring Instruments: Benchmark Tasks	460
	22.7 Measuring Instrument: User Satisfaction Questionnaires	472
	22.8 UX Metrics	474
	22.9 Baseline Level	476
	22.10 Target Level	476
	22.11 Setting Levels	476
	22.12 Observed Results	480
	22.13 Practical Tips and Cautions for Creating UX Targets	481
	22.14 Rapid Approach to UX Goals, Metrics, and Targets	481
Chapter 23:	Empirical UX Evaluation: Preparation	483
	23.1 Introduction	483
	23.2 Evaluation Scope and Rigor	485
	23.3 Goals for an Empirical UX Evaluation Session	486
	23.4 Select Team Roles	487
	23.5 Prepare an Effective Range of User Tasks	488
	23.6 Recruit Participants	489
	23.7 Prepare for the Session	494
Chapter 24:	Empirical UX Evaluation: Data Collection Methods and Techniques	505
	24.1 Introduction	505
	24.2 Empirical Methods and Techniques for Generating and Collecting Qualitative UX Data	508
	24.3 Empirical Methods and Techniques for Generating and Collecting Quantitative UX Data	513
	24.4 Procedures for Empirical Data Collection Sessions	532
	24.5 Rapid Empirical Methods for Generating and Collecting Qualitative UX Evaluation Data	537
Chapter 25:	Analytic UX Evaluation: Data Collection Methods and Techniques	545
	25.1 Introduction	545
	25.2 Design Walk-Throughs and Reviews	547
	25.3 Focus Groups	549
	25.4 Expert UX Inspection	550
	25.5 Heuristic Evaluation, a UX Inspection Method	551
	25.6 Our Practical Approach to UX Inspection	557
Chapter 26:	UX Evaluation: Data Analysis	561
	26.1 Introduction	561
	26.2 Analyze Quantitative Data	561
	26.3 Analyze Qualitative UX Data	565
	26.4 Cost-Importance Analysis: Prioritizing Problems to Fix	571
	26.5 Feedback to the Process	584
	26.6 Lessons From the Field	585

Chapter 27:	UX Evaluation: Reporting Results	589
27.1	Introduction	589
27.2	Reporting Different Kinds of Data	591
27.3	Report Audiences	592
27.4	Report Content	595
27.5	Report Mechanics	596
Chapter 28:	Background: UX Evaluation	601
28.1	This is a Reference Chapter	601
28.2	The Dangers of Trying to (or Even Appearing to) do FORMAL Summative Evaluation in UX Practice	601
28.3	UX Evaluation Reliability	602
28.4	Historical Roots for UX Metrics and Targets	606
28.5	The Early A330 Airbus—An Example of the Need for Ecological Validity in Testing	606
28.6	Determining the Right Number of Participants	608
28.7	Historical Roots of the Critical Incident Technique	614
28.8	Other Methods for Identifying Emotional Response to UX Designs	616
28.9	Nielsen and Molich's Original Heuristics	619
28.10	UX Problem Data Management	620

Part 6: Connecting Agile UX with Agile Software Engineering

Chapter 29:	Connecting Agile UX With Agile Software Development	625
29.1	Introduction	625
29.2	Basics of Agile SE Methods	627
29.3	Lifecycle Aspects of Agile SE	630
29.4	Challenges of Agile SE Methods from the UX Perspective	635
29.5	What is Needed on the UX Side	636
29.6	Problems to Anticipate	637
29.7	A Synthesized Approach to Integrating Agile UX and Agile SE	638

Part 7: UX Affordances, the Interaction Cycle, and UX Design Guidelines

Chapter 30:	Affordances in UX Design	651
30.1	Introduction	651
30.2	Cognitive Affordances	654
30.3	Physical Affordances	661
30.4	Sensory Affordance	672
30.5	Functional Affordance	683
30.6	Emotional Affordance	684
30.7	Putting Affordances Together in Design	685
30.8	User-Created Affordances as a Wake-Up Call to Designers	689
Chapter 31:	The Interaction Cycle	695
31.1	Introduction	695
31.2	Norman's Stages-of-Action Model of Interaction	696

31.3	Interaction Cycle Categories of UX Design Issues	700
31.4	Cooperative User-System Task Performance within the Interaction Cycle	704
Chapter 32:	UX Design Guidelines	709
32.1	Introduction	709
32.2	Using and Interpreting UX Design Guidelines	710
32.3	Human Memory Limitations	712
32.4	Review of the Interaction Cycle Structure	717
32.5	Planning	717
32.6	Translation	722
32.7	Physical Actions	777
32.8	Outcomes	784
32.9	Assessment	789
32.10	Overall	808
32.11	Conclusions	824
Chapter 33:	Background: Affordances, the Interaction Cycle, and UX Design Guidelines	825
33.1	This is a Reference Chapter	825
33.2	A Little History of the Concept of Affordances	825
33.3	Confusion Over Affordances in Early HCI/UX	827
33.4	Examples of How Cognitive Affordances can be Informed by Shared Cultural Conventions	828
33.5	How Functional Affordances Fit in with Gibson's Ecological View	830
33.6	Where Did UX Design Guidelines Come from?	831
